

Technical drawing of a circular antenna port. The drawing shows a circular face with a central vertical axis and a horizontal centerline. The outer diameter is labeled $\phi 127$. The inner diameter of the central hole is labeled $\phi 8$. The outer diameter of the central hole is labeled $\phi 12.70$. The distance from the center of the circle to the center of the central hole is labeled 16. The distance from the center of the circle to the center of the two side holes is labeled 38.57. The distance from the center of the circle to the center of the two bottom holes is labeled 18. The distance from the center of the circle to the center of the two top holes is labeled 101.60. The drawing also shows a side view of the antenna port, which is a rectangular shape with a width of 3.38.
